

Shopware 5 Plugin: Release 4.5.0

Created by [PAYONE Admin](#) on 2021-08-12

Hi all,

we've just released a new Shopware 5 plugin. Here's what's new:

New Features

- added WeChatPay
- added Trustly payments
- compatibility to shopware 5.7.x

Bugfixes

- added cardholder field and validation. Ideally, you should see more transactions using the "frictionless" flow without any redirects to the cardholder bank.
- added cardholder param, translations, and validation fixes
- fixed some backend syntax errors
- several fixes for Amazon payments, Ratepay, credit card, PayPal and Klarna

Maintenance

- tested with Shop version 5.7.2

Known Issues

- You might notice error messages while saving the credit card config. This seems to occur due to a bug in Shopware >5.7.0 and should get fixed in a future shopware release. The config gets saved correctly. References: <https://issues.shopware.com/issues/SW-26140><https://issues.shopware.com/issues/SW-26126>

As usual, you can get it on Github:
