

Shopware 5 Plugin: New Release 4.3.1

Created by [PAYONE Admin](#) on 2020-09-03

Hi all,

we have released a patch version of our Shopware plugin. Here's what changed:

New Features

- Added support for Cloudflare's CF_CONNECTING_IP HTTP-Header
- Update s_order.change DB field on order change through TX Status (feature trigger)

Bugfixes

- Always submit correct RatePay Shop-ID
- Removed some debug junk from the Curl API adapter. It did no harm, but was definitely messy

Maintenance

- We now scroll back up to the error message when a wrong credit card number was entered but the error box was out of sight

Grab it while it's hot, either from the [Shopware Community Store](#) or here:
