

Shopware 5 Plugin: Release v4.2.2

Created by [PAYONE Admin](#) on 2020-05-04

Hi everyone,

we've just released a new version of our Shopware 5 plugin. Here's what's new:

Features

- Reminderlevel can now be individually mapped in status mapping

Bugfixes

- we're now registering the Amazon Pay cookie only if Amazon Pay is actually active
- bonus: we're only loading Amazon JS when Amazon is active, too
- fixed missing auto_cardtype_detection column
- fixed Klarna birth year selector
- transaction status forwarding is now more robust

Maintenance

- credit card type "discover" was deprecated (and is now processed as diners, so no actual feature regression)
